## **Letter of Recommendation**

To whom it may concern:

I write this letter to recommend Workspace Studio to any company looking to improve the ergonomics and esthetics of their offices while keeping full control of money and time spent.

Waters Corp. called on Workspace Studio to furnish their new office space in Brasov, Romania. We are always looking for the best working environment for our teams, so it came natural to choose Herman Miller furniture for workstations and common spaces.

The project, which was divided in two phases, consisted of 250 workstations, a variety of meeting rooms, small group offices, breakout spaces and a large cafeteria. Besides furniture, the common spaces were designed to include acoustic dampening solutions. Workspace Studio cooperated with our interior designers and were able to come with the furniture configurations, the materials and the colors to suit our choices. The final result is highly functional while looking both professional and trendy.

The people at Workspace Studio delivered the project smoothly, allowing our staff to focus on their own business. At all times they kept us fully informed on the status of the project.

I would not hesitate to call Workspace Studio again to supply furniture and acoustic solutions to Waters Corp.

Gheorghe Neagu  
Managing Director
